Waterproofing • Insulating • Drylining

**Tileable Basins**  
*Pre-Formed Ready for Tiling*

#### Key Benefits

- Fully waterproof
- Ready-to-tile
- Seamless integration with Marmox Multiboards and wetroom systems
- Lightweight yet strong
- Supplied with compatible waste fittings

The Marmox Multiboard Tilable Basin range makes it possible to create seamless, fully tiled washbasins and shelves that blend perfectly into any tiled space.

Produced from waterproof Marmox Multiboard. Each unit is strong, lightweight and designed to be tiled directly without extra preparation.

With options including a push plug basin, a linear drain basin and a matching shelf extension, the range provides complete flexibility for bathrooms, wetrooms, ensuites, and cloakrooms, delivering a durable, stylish and practical finish.

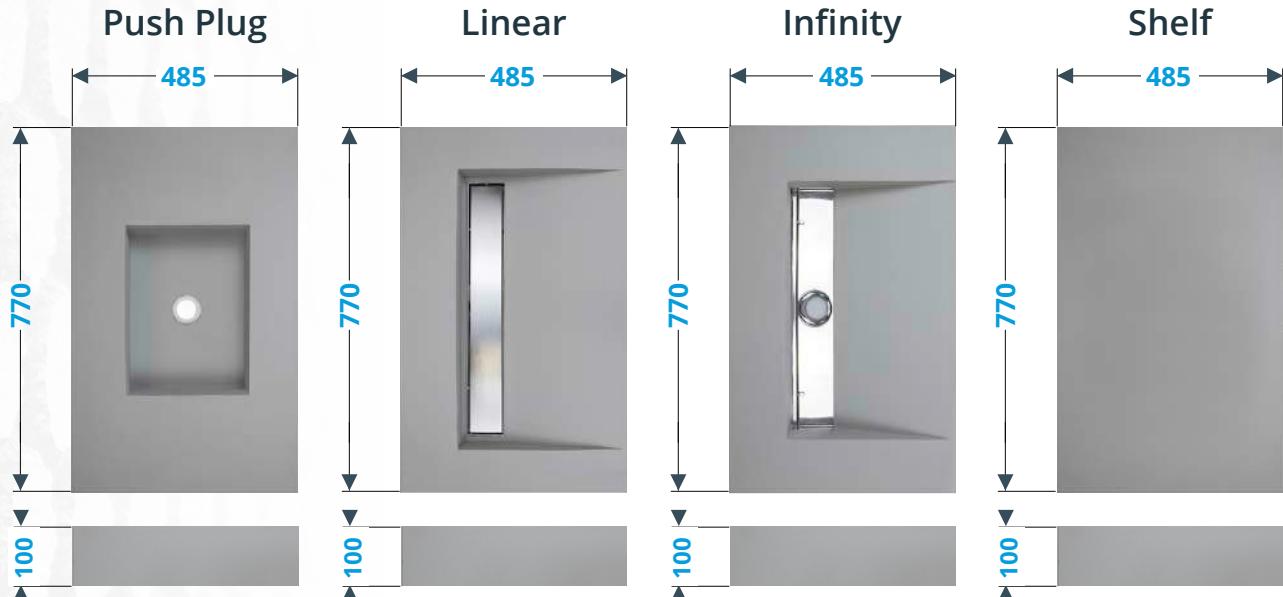

The basins slide easily onto internal sitting support bars.

#### Facts & Figures

Description	Size (mm)			Style
	Thickness	Width	Length	
Basins	100	485	770	Push Plug
Shelf/Extension				Linear
				No Drain

## The Full Range

### Tilable Basin - Push Plug

A simple, elegant square basin designed to be tiled for a discreet finish that blends into the surrounding wall or vanity. The push plug waste offers a neat, practical solution, making it ideal for both residential and commercial settings.

### Tilable Basin - Linear Drain

A sleek alternative with a contemporary edge, this basin uses a linear waste channel for a more refined appearance. Offering a distinctive style that works perfectly in modern bathrooms and wetrooms.

### Tilable Basin - Infinity Drain

A discreet design with a minimalist edge, this basin features a hidden waste channel concealed beneath the tiles for a seamless finish. Leaving only a pencil-thin gap between the tiles, allowing the water to drain away effectively.

### Tilable Shelf Extension

Matching the size and profile of the basins, the shelf can be installed as a standalone feature or positioned to extend a basin for extra surface space.
