

Marmox Decotray, an attractive, stylish shower tray for contemporary wetrooms

Decotray floor level synthetic stone shower tray features slip resistant surface, aesthetic looks and quality finish

Marmox Decotray provides an attractive feature point to any wetroom. It is a floor level sloping shower tray which sits flush with the surrounding floor* creating an open, step-free showering area. Decotray is constructed from Marmoxite, a patented resin bound synthetic stone moulded into one of two natural stone effects: Slate Grey and Polar White.

The trays are supplied with a compact drain kit comprising of an attractive brushed stainless steel grate which connects to an high flow rate gully with a 50mm water seal (to ensure smells from the drain cannot escape). The drain is also adjustable to make the outlet pipe horizontal, vertical or any angle in between.

*Marmox Decotray can be used with Marmox Plinth to create a raised platform if required.

Decotray Plus Points

- + Fully waterproof
- + R12 slip resistant surface
- + Stain resistant
- + Easy installation
- + High flow rate
- + Supplied with a drain kit & brushed stainless steel grate
- + Installation on timber & concrete floors
- + Marmox Lifetime Guarantee

The drain gully supplied can be adjusted from offering a vertical to horizontal outlet, or any angle in between.

Sizes, Colours and Surfaces

Decotray is available in a range of sizes and two finishes, Slate Grey and Polar White, both with a stone textured slip resistant surface.

Dark & Dramatic

Slate Grey

Light & Stylish

Polar White

Marmox Decotrays have a slope with a fall to the drain of at least 2%. They are 30mm thick around the perimeter and are available in the following sizes:

Length (mm)	Width (mm)	Thickness (mm)	Drain Location	Weight (kg)
1000	1000	30	Centre	20
1400	900	30	Offset	25
1850	900	30	Offset	35

Waterproof Barrier

Decotray is supplied with an overlapping waterproof fleece attached to the back which, when sealed to the surrounding floor and walls, creates a completely waterproof barrier. The tray's concealed edges can be cut to size if required. Use Marmox Multiboard adjacent to the tray for a guaranteed waterproof system.
